Accepted Manuscript

Nonstationary fuzzy forecasting of wind and wave climate in very long-term scales

Ch.N. Stefanakos, E. Vanem

PII: S2468-0133(17)30121-3
DOI: 10.1016/j.joes.2018.04.001
Reference: JOES 71

To appear in: *Journal of Ocean Engineering and Science*

Received date: 6 November 2017
Revised date: 12 February 2018
Accepted date: 13 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Combination of FIS/ANFIS models with nonstationary time series modelling
- RMSE, MAPE, MASE and RMSSE are used for the verification of forecasts
- Wind and wave predictions in the Northeast Atlantic Ocean
- Application for wave field predictions
- Wind and wave climatic predictions based on fuzzy systems for the first time
