This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Compares costs of a current service with an OBOR alternative.
- Calculates transit time advantages of OBOR versus current service.
- Illustrates the impact of OBOR on the breakeven utilization.
- Examines the effect of new ECAs along the route.
- Estimates the carbon burden vis--vis operational parameters and associated costs
