Assessment of Thermal Stratification, Stability and Characteristics of Deep Water Zone of the Southern Caspian Sea

Siamak Jamshidi

PII: S2468-0133(16)30056-0
DOI: [10.1016/j.joes.2017.08.005](https://doi.org/10.1016/j.joes.2017.08.005)
Reference: JOES 55

To appear in: *Journal of Ocean Engineering and Science*

Received date: 23 September 2016
Revised date: 24 December 2016
Accepted date: 17 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Thermal stratification and physical structure of water column in the southern Caspian Sea
- Stability of various layers of seawater in the investigated area
- Physical and chemical characteristics of seawater from coastal area to offshore region
