Application Of Soft Computing Techniques In Coastal Study – A Review

G.S. Dwarakish , B. Nithyapriya

PII: S2468-0133(16)30010-9
DOI: [10.1016/j.joes.2016.06.004](https://doi.org/10.1016/j.joes.2016.06.004)
Reference: JOES 22

To appear in: *Journal of Ocean Engineering and Science*

Received date: 21 March 2016
Revised date: 16 June 2016
Accepted date: 22 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- This paper reviews soft computing techniques and coastal remote sensing.
- Applicability of ANN in remote sensing is also dealt.
- Basics of SVM is covered.
- Evolution of types of SVM is briefly outlined.
- Advantages of SVM over other techniques is discussed.
