Macroporous diamond foam: A novel design of 3D interconnected heat conduction network for thermal management

Wentao Ye, Qiuping Wei, Long Zhang, Haichao Li, Jingting Luo, Li Ma, Zejun Deng, Cheng-Te Lin, Kechao Zhou

PII: S0264-1275(18)30484-2
DOI: doi:[10.1016/j.matdes.2018.06.017](https://doi.org/10.1016/j.matdes.2018.06.017)
Reference: JMADE 3987
To appear in: *Materials & Design*
Received date: 25 April 2018
Revised date: 8 June 2018
Accepted date: 9 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Macroporous diamond foam: a novel design of 3D interconnected heat conduction network for thermal management
