Biomimetic hydroxyapatite/gelatin composites for bone tissue regeneration: Fabrication, characterization, and osteogenic differentiation in vitro

He Lian, Liping Zhang, Zhaoxu Meng

PII: S0264-1275(18)30539-2
DOI: doi:[10.1016/j.matdes.2018.07.009](https://doi.org/10.1016/j.matdes.2018.07.009)
Reference: JMADE 4042
To appear in: *Materials & Design*
Received date: 13 April 2018
Revised date: 4 July 2018
Accepted date: 6 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Biomimetic hydroxyapatite/gelatin composites for bone tissue
regeneration: fabrication, characterization, and osteogenic
differentiation in vitro**
