

Accepted Manuscript

Wettability of AlSi7Mg alloy on alumina, spinel, mullite and rutile and its influence on the aluminum melt filtration efficiency

Claudia Voigt, Lisa Ditscherlein, Eric Werzner, Tilo Zienert, Rafal Nowak, Urs Peuker, Natalia Sobczak, Christos G. Aneziris

PII: S0264-1275(18)30296-X
DOI: doi:[10.1016/j.matdes.2018.04.026](https://doi.org/10.1016/j.matdes.2018.04.026)
Reference: JMADE 3839
To appear in: *Materials & Design*
Received date: 23 February 2018
Revised date: 3 April 2018
Accepted date: 9 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Wettability of AlSi7Mg alloy on alumina, spinel, mullite and rutile and its influence on the aluminum melt filtration efficiency
