

## Accepted Manuscript

Hollow ceramic microspheres prepared by combining electro-spraying with non-solvent induced phase separation method: A promising feedstock for thermal barrier coatings

Fangwei Guo, Xing Chen, Guowei Wang, Zouzhong Hua, Xin Wang, Qin Zhang, Xiaofeng Zhao, Ping Xiao

PII: S0264-1275(17)31053-5  
DOI: doi:[10.1016/j.matdes.2017.11.022](https://doi.org/10.1016/j.matdes.2017.11.022)  
Reference: JMADE 3499  
To appear in: *Materials & Design*  
Received date: 7 July 2017  
Revised date: 10 November 2017  
Accepted date: 10 November 2017

Please cite this article as: Fangwei Guo, Xing Chen, Guowei Wang, Zouzhong Hua, Xin Wang, Qin Zhang, Xiaofeng Zhao, Ping Xiao , Hollow ceramic microspheres prepared by combining electro-spraying with non-solvent induced phase separation method: A promising feedstock for thermal barrier coatings. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Jmade*(2017), doi:[10.1016/j.matdes.2017.11.022](https://doi.org/10.1016/j.matdes.2017.11.022)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
