Recovery of active cathode materials from lithium-ion batteries using froth flotation

Ruiting Zhan, Zachary Oldenburg, Lei Pan

PII: S2214-9937(18)30024-1
DOI: doi:[10.1016/j.susmat.2018.e00062](https://doi.org/10.1016/j.susmat.2018.e00062)
Article Number: e00062
Reference: SUSMAT 62
To appear in: *Sustainable Materials and Technologies*
Received date: 27 January 2018
Revised date: 2 April 2018
Accepted date: 8 June 2018

Acknowledgement:

The authors would like to acknowledge funding from the U.S. Environmental Protection Agency, Michigan Technological University, Pavlis Honor College, and MTU I-Corps Site program for their financial support. Thanks to Jennifer Eikenberry at Michigan Technological University for assistance with the ICP analysis. We would also like to extend my appreciation to Tim Eisele, Taehee Han, Hosop Shin, Owen Mills for helpful discussions. Special thanks to Angelo Biviano for proofreading this manuscript.

This publication was developed under Assistance Agreement No. SU839299 awarded by the U.S. Environmental Protection Agency to Michigan Technological University. It has not been formally reviewed by EPA. The views expressed in this document are solely those of authors of this article and do not necessarily reflect those of the agency.
