Density functional theory study on the effects of oxygen groups on band gap tuning of graphitic carbon nitrides for possible photocatalytic applications

Binghua Jing, Zhimin Ao, Zhenyuan Teng, Chengyin Wang, Jiabao Yi, Taicheng An

PII: S2214-9937(18)30055-1
DOI: doi:[10.1016/j.susmat.2018.04.001](https://doi.org/10.1016/j.susmat.2018.04.001)
Reference: SUSMAT 59

To appear in: *Sustainable Materials and Technologies*

Received date: 28 February 2018
Revised date: 29 March 2018
Accepted date: 2 April 2018

Please cite this article as: Binghua Jing, Zhimin Ao, Zhenyuan Teng, Chengyin Wang, Jiabao Yi, Taicheng An , Density functional theory study on the effects of oxygen groups on band gap tuning of graphitic carbon nitrides for possible photocatalytic applications. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Susmat(2017), doi:[10.1016/j.susmat.2018.04.001](https://doi.org/10.1016/j.susmat.2018.04.001)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Density Functional Theory Study on the Effects of Oxygen Groups on Band Gap
Tuning of Graphitic Carbon Nitrides for Possible Photocatalytic Applications**
