Nickel nanoclusters as a novel emitter for molecularly imprinted electrochemiluminescence based sensor toward nanomolar detection of creatinine

Bahareh Babamiri, Abdollah Salimi, Rahman Hallaj

PII: S0956-5663(18)30110-6
DOI: <https://doi.org/10.1016/j.bios.2018.02.022>
Reference: BIOS10284

To appear in: *Biosensors and Bioelectronic*

Received date: 6 December 2017
Revised date: 24 January 2018
Accepted date: 7 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Nickel nanoclusters as a novel emitter for molecularly imprinted
electrochemiluminescence based sensor toward nanomolar detection of
creatinine**
