

## Accepted Manuscript

Modifying Hernia Mesh Design to Improve Device Mechanical Performance and Promote Tension-Free Repair

Mohamed M. Ibrahim, Luke P. Poveromo, Richard R. Glisson, Agustin Cornejo, Alfredo E. Farjat, Ken Gall, Howard Levinson

PII: S0021-9290(18)30043-5

DOI: <https://doi.org/10.1016/j.jbiomech.2018.01.022>

Reference: BM 8538

To appear in: *Journal of Biomechanics*

Accepted Date: 14 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

*Authors:*

Mohamed M. Ibrahim, MD<sup>1</sup>

Luke P. Poveromo, BS<sup>2</sup>

Richard R. Glisson, BS<sup>3</sup>

Agustin Cornejo, MD<sup>1</sup>

Alfredo E. Farjat, PhD<sup>4</sup>

Ken Gall, PhD<sup>5</sup>

Howard Levinson, MD<sup>1,6,7</sup>

*Affiliations:*

<sup>1</sup> Division of Plastic and Reconstructive Surgery, Department of Surgery, Duke University Medical Center, Durham, NC, 27710, USA

<sup>2</sup> Duke University School of Medicine, Duke University Medical Center, Durham, NC, 27710, USA

<sup>3</sup> Department of Orthopaedic Surgery, Duke University Medical Center, Durham NC, 27710, USA

<sup>4</sup> Department of Biostatistics and Bioinformatics, Duke University Medical Center, Durham NC, 27710, USA

<sup>5</sup> Department of Mechanical Engineering and Materials Science, Duke University, Durham, NC, 27710, USA

<sup>6</sup> Department of Dermatology, Duke University, Durham, NC, 27710, USA

<sup>7</sup> Department of Pathology, Duke University, Durham, NC, 27710, USA

*Presentations:*

Data from this manuscript was accepted and presented at the Plastic Surgery Research Council Annual Meeting on May 21, 2016 in New York City, NY. The title of the presentation was, "Development of a Suture-less Hernia Mesh with Enhanced Anchoring Strength."

*Running Head:*

Hernia Mesh with Enhanced Mechanical Performance
