Estimation of unmeasured ground reaction force data based on the oscillatory characteristics of the center of mass during human walking

Hansol X. Ryu, Sukyung Park

PII: S0021-9290(18)30086-1

DOI: <https://doi.org/10.1016/j.jbiomech.2018.01.046>

Reference: BM 8563

To appear in: *Journal of Biomechanics*

Accepted Date: 31 January 2018

Please cite this article as: H.X. Ryu, S. Park, Estimation of unmeasured ground reaction force data based on the oscillatory characteristics of the center of mass during human walking, *Journal of Biomechanics* (2018), doi: <https://doi.org/10.1016/j.jbiomech.2018.01.046>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Estimation of unmeasured ground reaction force data based on the oscillatory characteristics of the center of mass during human walking

Hansol X. Ryu and Sukyung Park

Department of Mechanical Engineering, Korea Advanced Institute of Science and Technology (KAIST), Daejeon, Korea

Short Title: Estimation of ground reaction force based on the oscillatory characteristics of walking

Sukyung Park

Department of Mechanical Engineering, KAIST

335 Gwahangno, Yuseong-gu

Daejeon 305-701

Republic of Korea

Phone: 82-42-350-3230

Fax: 82-42-350-5230

Email: sukyungp@kaist.ac.kr

Key Words: Ground reaction force, Center of mass, Center of pressure, Compliant legged walking model, Human walking

Word count (Introduction through Acknowledgement): 3531 words
