Kinesio taping influences the mechanical behaviour of the skin of the low back:
A possible pathway for functionally relevant effects

Stephanie R. Cimino, Shawn M. Beaudette, Stephen H.M. Brown

PII: S0021-9290(17)30709-1

DOI: <https://doi.org/10.1016/j.jbiomech.2017.12.005>

Reference: BM 8491

To appear in: *Journal of Biomechanics*

Accepted Date: 4 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Kinesio taping influences the mechanical behaviour of the skin of the low back: a possible pathway for functionally relevant effects

Stephanie R. Cimino, Shawn M. Beaudette, Stephen H. M. Brown*

Department of Human Health and Nutritional Sciences, University of Guelph, Guelph ON,
Canada

Submitted to: Journal of Biomechanics, Revision 2

Word count: 3413

Key words: skin; mechanical stress; ultrasonography; spine; rehabilitation
