Analysis of pelvic strain in different gait configurations in a validated cohort of computed tomography based finite element models

Zoryana Salo, Maarten Beek, David Wright, Asmaa Maloul, Cari Marisa Whyne

PII: S0021-9290(17)30471-2
DOI: <http://dx.doi.org/10.1016/j.jbiomech.2017.09.014>
Reference: BM 8373

To appear in: *Journal of Biomechanics*

Accepted Date: 10 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Analysis of pelvic strain in different gait configurations in a validated cohort of computed tomography based finite element models
