The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Nano(2018), doi:10.1016/j.nano.2018.02.013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

High sensitive and multiple detection of Acute Myocardial

Infarction Biomarkers based on a dual-readout

Immunochromatography Test Strip

Word count for Abstract: 149

Word count for Manuscript: 5578

Number of Figures: 8

Number of References: 39

Number of Tables: 0
