This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title:

Toward Detection of Toxoplasmosis from Urine in Mice Using Hydro-Gel Nanoparticles Concentration and Parallel Reaction Monitoring Mass Spectrometry

Authors:

Hannah E. Steinberg, MSPH^{1*}; Paul Russo, PhD²; Noelia Angulo, DVM³; Raúl Ynocente, BS⁴; Cristina Montoya, BS⁴; Andrea Diestra, BS³; Cusi Ferradas, DVM^{1,3}; Francesca Schiaffino, DVM^{1,3}; Edgar Florentini, BS³; Juan Jimenez, PhD⁴; Maritza Calderón, PhD³; Vern B. Carruthers, PhD⁶; Robert H. Gilman, MD¹; Lance Liotta, MD/PhD²; Alessandra Luchini, PhD²

Funding from INNOVATE PERU (137-PNICP-PIAP) allowed for the collaboration of Universidad Peruana Cayetano Heredia and Universidad Nacional Mayor de San Marcos as well as equipment, training and materials. Dr. Gilman's 1D43TW010074-01 supported the training of many of the Peruvian authors. This study was partially funded by the following grants to Dr. Liotta: NIH NCI R33CA173359 and R33CA206937, NIAID R21AI099851 and R21AI117425, NIAMS 1R01AR068436. Drs. Liotta and Luchini are inventors on patents related to the nanoparticles. Ceres Nanosciences licensed the rights of these patents that are owned by George Mason University. Drs. Liotta and Luchini own shares of Ceres Nanosciences.

Put on the title page a list:

Word count for Abstract: 150

Word count for manuscript: 4441

Number of References: 29

Number of figures: 4

Number of tables: 3

Number of Supplementary online-only file: 1
