Stem cell-based gene delivery mediated by cationic niosomes for bone regeneration

Noha Attia, Mohamed Mashal, Santiago Grijalvo, Ramon Eritja, Jon Zárate, Gustavo Puras, José Luis Pedraz

PII: S1549-9634(17)30200-9
DOI: doi: [10.1016/j.nano.2017.11.005](https://doi.org/10.1016/j.nano.2017.11.005)
Reference: NANO 1690

To appear in: *Nanomedicine: Nanotechnology, Biology, and Medicine*

Received date: 9 June 2017
Revised date: 6 October 2017
Accepted date: 6 November 2017

Please cite this article as: Attia Noha, Mashal Mohamed, Grijalvo Santiago, Eritja Ramon, Zárate Jon, Puras Gustavo, Pedraz José Luis, Stem cell-based gene delivery mediated by cationic niosomes for bone regeneration, *Nanomedicine: Nanotechnology, Biology, and Medicine* (2017), doi: [10.1016/j.nano.2017.11.005](https://doi.org/10.1016/j.nano.2017.11.005)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title page.**Stem cell-based gene delivery mediated by cationic niosomes for bone regeneration**

Noha Attia^{a,b,*}, Mohamed Mashal^{a,*}, Santiago Grijalvo^{c,d}, Ramon Eritja^{c,d}, Jon Zárata^{a,d}, Gustavo Puras^{a,d,#} and José Luis Pedraz^{a,d,#}.

This manuscript or any part of it has not been published and will not be submitted elsewhere for publication while being considered by *Journal Nanomedicine: Nanotechnology, Biology, and Medicine*. Authors do not declare any conflict of interest.

The manuscript contains the following information:

Word count of the abstract: 150.

Manuscript word count (body text and figure legends included): 5271.

Number of references: 47

Number of figures: 7 figures

Number of tables: 0

Number of Supplementary online-only files: 1 Figure and 1 Table

This project was supported by the Basque Country Government (CGIC10/172), Spanish Ministry of Education (Grant CTQ2014-52588-R), the Generalitat de Catalunya (2014/SGR/624) and the Instituto de Salud Carlos III (CB06_01_0019, CB06_01_1028). The authors also wish to thank the intellectual and technical assistance from the ICTS “NANBIOSIS”, more specifically by the Drug Formulation Unit (U10) of the CIBER in Bioengineering, Biomaterials, and Nanomedicine (CIBER-BBN) at the University of Basque Country (UPV/EHU). Dr. Noha Attia would like to thank the science & technology development fund (STDF) for receiving the short term fellowship (STF call 5, Project 11951). Technical and human support provided by SGIker (UPV/EHU) is gratefully acknowledged.
