

## Accepted Manuscript

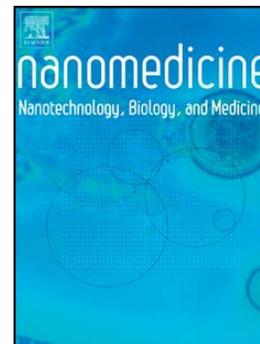

Gold nanoparticles in injectable calcium phosphate cement enhance osteogenic differentiation of human dental pulp stem cells

Yang Xia, Huimin Chen, Feimin Zhang, Chongyun Bao, Michael D. Weir, Mark A. Reynolds, Junqing Ma, Ning Gu, Hockin H.K. Xu

PII: S1549-9634(17)30161-2  
DOI: doi: [10.1016/j.nano.2017.08.014](https://doi.org/10.1016/j.nano.2017.08.014)  
Reference: NANO 1652

To appear in: *Nanomedicine: Nanotechnology, Biology, and Medicine*

Received date: 29 April 2017  
Revised date: 18 July 2017  
Accepted date: 15 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
