Title: Attachment and Psychoneuroimmunology

Author: Katherine B. Ehrlich

PII: S2352-250X(18)30024-1

DOI: <https://doi.org/doi:10.1016/j.copsyc.2018.03.012>

Reference: COPSYC 640

To appear in:

Received date: 16-1-2018

Accepted date: 26-3-2018

Please cite this article as: K.B. Ehrlich, Attachment and Psychoneuroimmunology, *COPSYC* (2018), <https://doi.org/10.1016/j.copsyc.2018.03.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Insecure attachment has been linked to measures of the immune system
- Theory suggests secure attachment may serve as a buffer in the face of adversity
- Attachment may influence physical health via modulations to the immune system
