Accepted date: 8-12-2017

Please cite this article as: N. Koudenburg, Regulating Shared Reality with Micro-Dynamics in the Form of Conversation, *COPSYC* (2017), <https://doi.org/10.1016/j.copsyc.2017.12.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- * Conversational micro-dynamics shape the emergence and regulation of shared reality.
- * Research illustrates this in three contexts: online, intergroup, and among intimates.
- * Disruptions of conversational flow can motivate conformity to social norms.
- * The implicit nature of conversational micro-dynamics may contribute to their power.
