This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

DeLongis Current Opinion Highlights August 19, 2016

Divorce rate in first-marriages has stabilized, but in remarriages it continues to rise.

Stepfamily stress increases the risk of divorce via depression and marital distress.

Stepparent relationship problems with children are factors of divorce in stepfamilies.
