This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlight

- We investigate the effect of winning and losing a real-life lottery on dishonesty
- Lottery losers behave significantly more dishonestly than lottery winners
- Dishonesty monotonically increases with the size of loss incurred in the lottery
- Winning a lottery has not the same effect on dishonesty as winning a competition
