This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- We analyze long-term effects of a high school entrepreneurship education program.
- We compare three cohorts of program alumni to a matched sample of individuals.
- The program increases long-term probability of starting a firm.
- The program increases expected entrepreneurial income.
- The program does not have any effect on firm survival.
