What Happened to the Employed During the Great Recession? A U.S. Population Study of Net  
Change in Employee Insecurity, Health, and Organizational Commitment

Michael R. Frone

State University of New York at Buffalo

Data collection was supported by grants (R01-AA012412, R01-AA016592) from the National Institute on Alcohol Abuse and Alcoholism to Michael R. Frone. The content of this project is solely the responsibility of the author and does not necessarily represent the official views of the National Institute on Alcohol Abuse and Alcoholism or the National Institutes of Health. These agencies had no role in study design; in the collection, analysis, and interpretation of data; in the writing of the report; or in the decision to submit the paper for publication.

Correspondence should be sent to Michael R. Frone at the Research Institute on Addictions, University at Buffalo, The State University of New York, 1021 Main Street, Buffalo, NY 14203, or via email at: frone@ria.buffalo.edu.

**Abstract**

This study explored the effects of the Great Recession on U.S. workers who remain employed. The first goal was to assess net population change in job and employment insecurity, physical
