This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Alexithymia and interoception: problems with the heartbeat counting task

Journal: Biological Psychology

Running head: Alexithymia and interoception: problems with the heartbeat counting task

Word count: 6169 words

Submission date: 7th February 2018 (Revision date: 16th May 2018)

Is alexithymia characterised by impaired interoception? Further evidence, the importance of control variables, and the problems with the Heartbeat Counting Task
