

## Accepted Manuscript

The role of P2X7R/ERK signaling in dorsal root ganglia satellite glial cells in the development of chronic postsurgical pain induced by skin/muscle incision and retraction (SMIR)

Jingnian Song, Yanlu Ying, Wei Wang, Xianguo Liu, Xuebing Xu, Xuhong Wei, Xiangcai Ruan

PII: S0889-1591(17)30512-3  
DOI: <https://doi.org/10.1016/j.bbi.2017.11.011>  
Reference: YBRBI 3282

To appear in: *Brain, Behavior, and Immunity*

Received Date: 19 July 2017  
Revised Date: 16 November 2017  
Accepted Date: 16 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The role of P2X7R/ERK signaling in dorsal root ganglia satellite glial cells in the development of chronic postsurgical pain induced by skin/muscle incision and retraction (SMIR)**
