Perceived Stress and Telomere Length: A Systematic Review, Meta-Analysis,
and Methodologic Considerations for Advancing the Field

Maya B. Mathur, Elissa Epel, Shelley Kind, Manisha Desai, Christine G. Parks,
Dale P. Sandler, Nayer Khazeni

PII: S0889-1591(16)30023-X
DOI: <http://dx.doi.org/10.1016/j.bbi.2016.02.002>
Reference: YBRBI 2796

To appear in: *Brain, Behavior, and Immunity*

Received Date: 25 October 2015
Revised Date: 23 January 2016
Accepted Date: 3 February 2016

Please cite this article as: Mathur, M.B., Epel, E., Kind, S., Desai, M., Parks, C.G., Sandler, D.P., Khazeni, N., Perceived Stress and Telomere Length: A Systematic Review, Meta-Analysis, and Methodologic Considerations for Advancing the Field, *Brain, Behavior, and Immunity* (2016), doi: <http://dx.doi.org/10.1016/j.bbi.2016.02.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Perceived Stress and Telomere Length: A Systematic Review, Meta-Analysis, and Methodologic Considerations for Advancing the Field

Running title: Perceived Stress and Telomere Length

Maya B. Mathur, MS^{1*}, Elissa Epel, PhD², Shelley Kind, BA³, Manisha Desai, PhD¹, Christine G. Parks, PhD⁴, Dale P. Sandler, PhD⁴, Nayer Khazeni, MD, MS^{5,6}
