Principles behind variance misallocation in temporal exploratory factor analysis for ERP data: Insights from an inter-factor covariance decomposition

Florian Scharf, Steffen Nestler

PII: S0167-8760(18)30028-X
DOI: doi:[10.1016/j.ijpsycho.2018.03.019](https://doi.org/10.1016/j.ijpsycho.2018.03.019)
Reference: INTPSY 11425

To appear in: *International Journal of Psychophysiology*

Received date: 23 January 2018
Revised date: 10 March 2018
Accepted date: 27 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Principles behind variance misallocation in temporal exploratory factor analysis for
ERP data: Insights from an inter-factor covariance decomposition

Florian Scharf and Steffen Nestler
University of Leipzig

Author Note

Florian Scharf, Institute of Psychology, University of Leipzig, Germany. Steffen Nestler, Institute of Psychology, University of Leipzig, Germany. We embrace the values of openness and transparency in science (<http://www.researchtransparency.org/>). We have therefore published all data necessary to reproduce the reported results and provide reproducible scripts for all data analyses that were reported in this paper on the Open Science Framework.

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Conflicts of interest: none

Correspondence concerning this article should be addressed to Florian Scharf, Neumarkt 9 - 19, 04109 Leipzig, Germany Email: florian.scharf@uni-leipzig.de. Phone: +49 341 - 9735924
