Global cognitive profile and different components of reaction times in obstructive sleep apnea syndrome: Effects of continuous positive airway pressure over time

Maria Devita, Andrea Zangrossi, Maurizio Marvisi, Paola Merlo, Maria Luisa Rusconi, Sara Mondini

PII: S0167-8760(17)30330-6
DOI: doi:[10.1016/j.ijpsycho.2017.10.003](https://doi.org/10.1016/j.ijpsycho.2017.10.003)
Reference: INTPSY 11335

To appear in: *International Journal of Psychophysiology*

Received date: 5 June 2017
Revised date: 12 August 2017
Accepted date: 5 October 2017

Please cite this article as: Maria Devita, Andrea Zangrossi, Maurizio Marvisi, Paola Merlo, Maria Luisa Rusconi, Sara Mondini, Global cognitive profile and different components of reaction times in obstructive sleep apnea syndrome: Effects of continuous positive airway pressure over time. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Intpsy*(2017), doi:[10.1016/j.ijpsycho.2017.10.003](https://doi.org/10.1016/j.ijpsycho.2017.10.003)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Global cognitive profile and different components of reaction times in obstructive sleep apnea syndrome: effects of continuous positive airway pressure over time

Running head: Effects of CPAP on cognition and reaction times

Maria Devita¹, Andrea Zangrossi², Maurizio Marvisi^{3,4}, Paola Merlo⁵, Maria Luisa Rusconi¹, & Sara Mondini^{2,6}.
