

## Accepted Manuscript

Behavioral Reconsolidation Interference with Episodic Memory Within-Subjects is Elusive

Daniel A. Levy, Rotem Mika, Cecilia Radzimirski, Shir Ben-Zvi, Roni Tibon

PII: S1074-7427(18)30058-3  
DOI: <https://doi.org/10.1016/j.nlm.2018.03.004>  
Reference: YNLME 6824

To appear in: *Neurobiology of Learning and Memory*

Received Date: 18 October 2017  
Revised Date: 26 January 2018  
Accepted Date: 5 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Behavioral Reconsolidation Interference with Episodic Memory Within-Subjects is Elusive**

*Number of Figures:* 4

*Number of Tables:* 0

*Number of words:* 6805

*Abbreviated Title:* Elusive Reconsolidation Interference

**Highlights**

- We assessed behavioral reconsolidation interference in episodic memory
- Employed within-subjects paradigm measuring direct memory strength
- Three experiments found no effects of reminder-potentiated interference
- Null effects were substantiated by Bayesian analyses
- Highlights boundary conditions for behavioral reconsolidation interference effects
