Staufen2 deficiency leads to impaired response to novelty in mice

Bastian Popper, Antonia Demleitner, Valerie J. Bolivar, Gretchen Kusek,
Abigail Snyder-Keller, Rico Schieweck, Sally Temple, Michael A. Kiebler

PII: S1074-7427(18)30047-9
DOI: <https://doi.org/10.1016/j.nlm.2018.02.027>
Reference: YNLME 6819

To appear in: *Neurobiology of Learning and Memory*

Received Date: 30 October 2017
Revised Date: 25 January 2018
Accepted Date: 22 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Staufen2 deficiency leads to impaired response to novelty in mice
