Title: Do mothers sound good? A systematic review of the effects of maternal voice exposure on preterm infants' development

Authors: Livio Provenzi, Sara Broso, Rosario Montirosso

PII: S0149-7634(17)30199-9
DOI: <https://doi.org/10.1016/j.neubiorev.2018.03.009>
Reference: NBR 3067

To appear in:

Received date: 7-3-2017
Revised date: 12-1-2018
Accepted date: 9-3-2018

Please cite this article as: Provenzi L, Broso S, Montirosso R, Do mothers sound good? A systematic review of the effects of maternal voice exposure on preterm infants' development, *Neuroscience and Biobehavioral Reviews* (2010), <https://doi.org/10.1016/j.neubiorev.2018.03.009>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Do mothers sound good?

A systematic review of the effects of maternal voice exposure on preterm infants' development

Livio PROVENZI (PhD, PsyD)¹, Sara BROSO (PsyM)¹, Rosario MONTIROSSO¹ (PsyD)

¹ 0-3 Center for the at-Risk Infant, Scientific Institute IRCCS Eugenio Medea, Bosisio Parini, LC, Italy

Running head: Maternal voice to preterm infants in NICU

Conflict of interests: none

Highlights

- Preterm infants are precociously separated from the mother
- Maternal voice might facilitate mother-infant contact during hospitalization
- A systematic review of maternal voice effects was carried on
- Robust effects emerged for feeding, cognitive and neurobehavioral development
- Maternal voice exposure should be delivered to preterm infants and their mothers
