

## Accepted Manuscript

Title: A place for the hippocampus in the cocaine addiction circuit: potential roles for adult hippocampal neurogenesis

Author: Estela Castilla-Ortega Antonia Serrano Eduardo Blanco Pedro Araos Juan Suárez Francisco J. Pavón Fernando Rodríguez de Fonseca Luis J. Santín

PII: S0149-7634(15)30125-1  
DOI: <http://dx.doi.org/doi:10.1016/j.neubiorev.2016.03.030>  
Reference: NBR 2398

To appear in:

Received date: 12-8-2015  
Revised date: 8-3-2016  
Accepted date: 8-3-2016

Please cite this article as: Castilla-Ortega, Estela, Serrano, Antonia, Blanco, Eduardo, Araos, Pedro, Suárez, Juan, Pavón, Francisco J., de Fonseca, Fernando Rodríguez, Santín, Luis J., A place for the hippocampus in the cocaine addiction circuit: potential roles for adult hippocampal neurogenesis. *Neuroscience and Biobehavioral Reviews* <http://dx.doi.org/10.1016/j.neubiorev.2016.03.030>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- The hippocampus is an important component of the cocaine addiction brain circuit
- Adult hippocampal neurogenesis (AHN) modulates hippocampal plasticity and function
- Preliminary animal research suggests a role of AHN in cocaine-related behaviors
