This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Brings together a number of previously called second hits for schizophrenia to explore how they may act upon a spectrum to contribute to the risk of schizophrenia
- Builds upon the previous neurodevelopmental theory of schizophrenia
- Builds upon a previous paper which detailed the neuroprogressive processes seen in schizophrenia
- Some of the most renowned schizophrenia researchers in Australia are senior authors
