Title: Translating Depression Biomarkers for Improved Targeted Therapies

Author: David S. Bredt Maura L. Furey Guang Chen Tim Lovenberg Wayne C. Drevets Husseini K. Manji

PII: S0149-7634(15)00246-8
DOI: http://dx.doi.org/doi:10.1016/j.neubiorev.2015.09.013
Reference: NBR 2273

To appear in:

Received date: 14-5-2015
Revised date: 18-9-2015
Accepted date: 24-9-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlight

- Biomarkers from diverse technologies are transforming our understanding of depression
- Insights from mood biomarkers enable translational strategies for drug discovery
- Experimental human models accelerate validation of novel antidepressant drug targets
- Enhancing synaptic plasticity can rapidly improve mood in refractory patients

Translating Depression Biomarkers for Improved Targeted Therapies

David S. Bredt[1]*, Maura L. Furey[1], Guang Chen[1], Tim Lovenberg[1], Wayne C. Drevets[2], Husseini K. Manji[2]
