Title: The neural basis of one's own conscious and unconscious emotional states

Author: Ryan Smith Richard D. Lane

PII: S0149-7634(15)00203-1
DOI: <http://dx.doi.org/doi:10.1016/j.neubiorev.2015.08.003>
Reference: NBR 2243

To appear in:

Received date: 21-1-2015
Revised date: 1-7-2015
Accepted date: 1-8-2015

Please cite this article as: Smith, R., Lane, R.D., The neural basis of one's own conscious and unconscious emotional states, *Neuroscience and Biobehavioral Reviews* (2015), <http://dx.doi.org/10.1016/j.neubiorev.2015.08.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

Emotional experience involves generative, perceptual, and regulatory systems

Evidence suggests each of these systems is hierarchically organized

Multiple emotional appraisal mechanisms iteratively adjust cognitive/somatic states

Emotional body states are detected via an interoceptive perceptual hierarchy

Regulation occurs via hierarchical control of somatic states and appraisal mechanisms
