

## Accepted Manuscript

Title: Emotional consequences of neuropathic pain: Insight from preclinical studies

Author: Ipek Yalcin Florent Barthas Michel Barrot

PII: S0149-7634(14)00200-0  
DOI: <http://dx.doi.org/doi:10.1016/j.neubiorev.2014.08.002>  
Reference: NBR 2006

To appear in:

Received date: 9-5-2014  
Revised date: 15-7-2014  
Accepted date: 3-8-2014

Please cite this article as: Yalcin, I., Barthas, F., Barrot, M., Emotional consequences of neuropathic pain: insight from preclinical studies, *Neuroscience and Biobehavioral Reviews* (2014), <http://dx.doi.org/10.1016/j.neubiorev.2014.08.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Mood disorders are frequently observed in patients suffering from neuropathic pain.
- Anxiodepressive phenotypes in animals with neuropathic pain can be modelled.
- Sustained neuropathic pain differs from stress regarding neuroendocrine response.
- Morphological and functional brain alterations accompany neuropathic pain.
