Individual differences in bitter taste preferences are associated with antisocial personality traits

Christina Sagioglou, Tobias Greitemeyer

PII: S0195-6663(15)30042-8

DOI: [10.1016/j.appet.2015.09.031](https://doi.org/10.1016/j.appet.2015.09.031)

Reference: APPET 2717

To appear in: *Appetite*

Received Date: 26 May 2015

Revised Date: 17 September 2015

Accepted Date: 25 September 2015

Please cite this article as: Sagioglou C. & Greitemeyer T., Individual differences in bitter taste preferences are associated with antisocial personality traits, *Appetite* (2015), doi: 10.1016/j.appet.2015.09.031.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
