

# Accepted Manuscript

Title: Neural predictors of chocolate intake following chocolate exposure

Author: Astrid Frankort, Anne Roefs, Nicolette Siep, Alard Roebroek, Remco Havermans, Anita Jansen

PII: S0195-6663(14)00765-X

DOI: <http://dx.doi.org/doi: 10.1016/j.appet.2014.12.204>

Reference: APPET 2378

To appear in: *Appetite*

Received date: 15-7-2014

Revised date: 23-11-2014

Accepted date: 13-12-2014

Please cite this article as: Astrid Frankort, Anne Roefs, Nicolette Siep, Alard Roebroek, Remco Havermans, Anita Jansen, Neural predictors of chocolate intake following chocolate exposure, *Appetite* (2014), <http://dx.doi.org/doi: 10.1016/j.appet.2014.12.204>.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head: NEURAL PREDICTORS OF CHOCOLATE INTAKE

Neural predictors of chocolate intake following chocolate exposure

Astrid Frankort<sup>a</sup>, Anne Roefs<sup>a</sup>, Nicolette Siep<sup>a</sup>, Alard Roebroek<sup>b</sup>, Remco Havermans<sup>a</sup>, and  
Anita Jansen<sup>a</sup>

Highlights:

- we explored if neural correlates of food reward and inhibition could predict intake
