The Eyes Reveal Uncertainty about Object Distinctions in Semantic Variant Primary Progressive Aphasia

Andreia V. Faria, David Race, Kevin Kim, Argye E. Hillis

PII: S0010-9452(18)30104-7

DOI: [10.1016/j.cortex.2018.03.023](https://doi.org/10.1016/j.cortex.2018.03.023)

Reference: CORTEX 2287

To appear in: *Cortex*

Received Date: 1 September 2017

Revised Date: 15 February 2018

Accepted Date: 22 March 2018

Please cite this article as: Faria AV, Race D, Kim K, Hillis AE, The Eyes Reveal Uncertainty about Object Distinctions in Semantic Variant Primary Progressive Aphasia, *CORTEX* (2018), doi: 10.1016/j.cortex.2018.03.023.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The Eyes Reveal Uncertainty about Object Distinctions in  
Semantic Variant Primary Progressive Aphasia**

Andreia V. Faria, David Race, Kevin Kim, and Argye E. Hillis

Key words: primary progressive aphasia, semantics, eye tracking, temporal poles, semantic dementia

Word count: Abstract: 210; text: 3746; total: 5584

Figures: 6 (do not need to be printed in color; all but Figure 2 should be in color for on-line version)

Tables: 3
