The Asymmetrical Effect of Leftward and Rightward Prisms on Intact Visuospatial Cognition

Selene Schintu, Ivan Patané, Michela Caldano, Romeo Salemme, Karen T. Reilly, Laure Pisella, Alessandro Farnè

PII: S0010-9452(17)30321-0

DOI: [10.1016/j.cortex.2017.09.015](https://doi.org/10.1016/j.cortex.2017.09.015)

Reference: CORTEX 2136

To appear in: *Cortex*

Received Date: 8 July 2015

Revised Date: 11 August 2017

Accepted Date: 12 September 2017

Please cite this article as: Schintu S, Patané I, Caldano M, Salemme R, Reilly KT, Pisella L, Farnè A, The Asymmetrical Effect of Leftward and Rightward Prisms on Intact Visuospatial Cognition, *CORTEX* (2017), doi: [10.1016/j.cortex.2017.09.015](https://doi.org/10.1016/j.cortex.2017.09.015).

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title**The Asymmetrical Effect of Leftward and Rightward Prisms on Intact Visuospatial Cognition****Abbreviated title**

Biasing line bisection leftward and rightward

Acknowledgments

This work was supported by ANR-11-LABX-0042, the Fondation pour la Recherche Médicale and a James S. McDonnell Foundation Scholar Award to AF. The authors would like to thank, Sabra Clauser for helping with recruiting and testing participants. The authors declare no competing financial interests.

Manuscript information

Number of pages: 16

Number of figures: 2

Number of words in the Abstract, Introduction, and Discussion: 299, 690, 1726

Keywords

Line bisection; pseudoneglect; visuospatial cognition; plasticity; prism adaptation.
