Importance of human right inferior frontoparietal network connected by inferior branch of superior longitudinal fasciculus tract in corporeal awareness of kinesthetic illusory movement

Kaoru Amemiya, Eiichi Naito, PhD

PII: S0010-9452(16)30011-9

DOI: [10.1016/j.cortex.2016.01.017](https://doi.org/10.1016/j.cortex.2016.01.017)

Reference: CORTEX 1687

To appear in: *Cortex*

Received Date: 26 May 2015

Revised Date: 14 December 2015

Accepted Date: 18 January 2016

Please cite this article as: Amemiya K, Naito E, Importance of human right inferior frontoparietal network connected by inferior branch of superior longitudinal fasciculus tract in corporeal awareness of kinesthetic illusory movement, *CORTEX* (2016), doi: 10.1016/j.cortex.2016.01.017.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Importance of human right inferior frontoparietal network connected by inferior branch of superior longitudinal fasciculus tract in corporeal awareness of kinesthetic illusory movement
