Cognitive deficits at age 22 years associated with prenatal exposure to methylmercury

Frodi Debes, Pal Weihe, Philippe Grandjean

PII: S0010-9452(15)00176-8

DOI: [10.1016/j.cortex.2015.05.017](https://doi.org/10.1016/j.cortex.2015.05.017)

Reference: CORTEX 1482

To appear in: *Cortex*

Received Date: 10 November 2014

Revised Date: 3 May 2015

Accepted Date: 11 May 2015

Please cite this article as: Debes F, Weihe P, Grandjean P, Cognitive deficits at age 22 years associated with prenatal exposure to methylmercury, CORTEX (2015), doi: 10.1016/j.cortex.2015.05.017.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Cognitive deficits at age 22 years associated with prenatal exposure to methylmercury
