Working-memory endophenotype and dyslexia-associated genetic variant predict dyslexia phenotype

Claudia Männel, Lars Meyer, Arndt Wilcke, Johannes Boltze, Holger Kirsten, Angela D. Friederici

PII: S0010-9452(15)00242-7

DOI: [10.1016/j.cortex.2015.06.029](https://doi.org/10.1016/j.cortex.2015.06.029)

Reference: CORTEX 1528

To appear in: *Cortex*

Received Date: 25 September 2014

Revised Date: 28 April 2015

Accepted Date: 2 June 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Working-memory endophenotype and dyslexia-associated genetic variant predict
dyslexia phenotype**
