tDCS in post-stroke aphasia: The role of stimulation parameters, behavioral treatment and patient characteristics

Vânia de Aguiar, Caterina Paolazzi, Gabriele Miceli, MD

PII: S0010-9452(14)00268-8

DOI: [10.1016/j.cortex.2014.08.015](https://doi.org/10.1016/j.cortex.2014.08.015)

Reference: CORTEX 1271

To appear in: *Cortex*

Received Date: 27 April 2014

Revised Date: 30 July 2014

Accepted Date: 10 August 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

tDCS in post-stroke aphasia: the role of stimulation parameters, behavioral treatment and patient characteristics
