Goal-directed mechanisms that constrain retrieval predict subsequent memory for new “foil” information

David A. Vogelsang, Heidi M. Bonnici, Zara M. Bergström, Charan Ranganath, Jon S. Simons

PII: S0028-3932(16)30260-3
DOI: <http://dx.doi.org/10.1016/j.neuropsychologia.2016.07.016>
Reference: NSY6069

To appear in: *Neuropsychologia*

Received date: 10 March 2016
Revised date: 12 July 2016
Accepted date: 15 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and a review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Goal-directed mechanisms that constrain retrieval predict subsequent
memory for new “foil” information**
