Anodal-tDCS over the human right occipital cortex enhances the perception and memory of both faces and objects

Marica Barbieri, Marcello Negrini, Michael A. Nitsche, Davide Rivolta

PII: S0028-3932(15)30270-0
DOI: <http://dx.doi.org/10.1016/j.neuropsychologia.2015.12.030>
Reference: NSY5841

To appear in: *Neuropsychologia*

Received date: 21 October 2015
Revised date: 10 December 2015
Accepted date: 28 December 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Anodal-tDCS over the human right occipital cortex enhances the
perception and memory of both faces and objects**
