**Author note:** This article reports data collected in the context of a larger research project that was not preregistered and, partly, have already been published (Becker, Burns, Garner, Jarrett, Luebbe, Epstein, & Willcutt, 2018, doi: 10.1037/PAS0000476). The primary findings do not overlap with previously reported results and the relevant data is available from the corresponding author upon request. SPB conceptualized the study with input from all other authors; SPB and GLB conducted analyses; SPB, APS, MAJ, and GLB drafted the manuscript; SPB, AML, MAJ, AAG, GLB conducted data collection and data preparation; all authors contributed critical scientific content to the final manuscript. Stephen Becker is supported by award number K23MH108603 from the National Institute of Mental Health (NIMH). The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health (NIH). All authors declare no conflict of interest.
