This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Moving toward greater security: The effects of
repeatedly priming attachment security and anxiety

Nathan W. Hudson

Southern Methodist University

R. Chris Fraley

University of Illinois at Urbana-Champaign

Author Note:

Correspondence regarding this manuscript should be sent to Nathan W. Hudson, Southern Methodist University, Department of Psychology, P.O. Box 750442, Dallas, TX, 75275; nwhudson@smu.edu. The authors thank P. Priscilla Lui for providing comments on a draft of this manuscript.

This study was conceptualized by Hudson and Fraley. Hudson collected and analyzed the data. Both authors contributed to drafting, editing, and revising the manuscript with Hudson serving as lead author.
